INSTRUCTIONS FOR USE
KYNMOBI™ (kin-moe′-bee)
(apomorphine hydrochloride)
Sublingual Film

Read this Instructions for Use before you start taking KYNMOBI and each time you get a refill. There may be new information. This information does not take the place of talking with your healthcare provider about your medical condition or treatment.

Important
- KYNMOBI is for sublingual (under your tongue) use only.
- KYNMOBI must be taken whole. Do not cut, chew, or swallow KYNMOBI.
- Do not take KYNMOBI until you talk with your healthcare provider about how to take it.
- Check the expiration date printed on the foil pouch. Do not use KYNMOBI if the expiration date has passed.
- Do not take more than 1 dose of KYNMOBI every 2 hours.
- Do not take more than 5 doses of KYNMOBI each day.

How to store KYNMOBI
- Store KYNMOBI at room temperature between 68°F to 77°F (20°C to 25°C).
- Keep KYNMOBI in the foil pouch until you are ready to take it.
- Keep KYNMOBI and all medicines out of the reach of children.

How KYNMOBI is packaged
Inside each child-resistant carton is a plastic tray with a pull-out handle that holds the sealed pouches of KYNMOBI sublingual film (see Figure A). Each KYNMOBI sublingual film comes in a sealed foil pouch (see Figure B).

ATTENTION: Read the Instructions for Use on the other side of this leaflet.

<tr>
<th>STEP 1 Open Carton</th>
<th>STEP 2 Remove Pouch</th>
<th>STEP 3 Close Carton</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open carton from the end with the arrow. Push in both tabs to unlock. Hold tabs in. (See Figure C.) Lift up tray handle. Pull out tray (see Figure D).</td>
<td>Push finger up through the hole in the bottom of tray. (See Figure E.) Firmly pull one (1) pouch from the tray (see Figure F).</td>
<td>To close, slide tray in until it clicks. (See Figure G.) This ensures the carton remains child resistant (see Figure H).</td>
</tr>

Instructions for Taking KYNMBOI

<table>
<thead>
<tr>
<th>Step 4</th>
<th>Step 5</th>
<th>Step 6</th>
<th>Step 7</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your healthcare provider has told you to take KYNMBOI 10 mg, 15 mg, 20 mg, 25 mg, or 30 mg. Complete Steps 5 through 10 to take KYNMBOI.</td>
<td>Drink water. Before taking each KYNMBOI, drink water to moisten your mouth. This helps the film dissolve more easily (see Figure I).</td>
<td>Open the KYNMBOI foil pouch. Hold the wing tabs on the pouch between your thumb and pointer finger of each hand. Make sure to place your fingers directly on the raised dots on each wing tab. Gently pull the wing tabs apart to open the pouch (see Figure J).</td>
<td>Take KYNMBOI out of the pouch. Hold KYNMBOI between your fingers by the outside edges and remove the entire KYNMBOI from the pouch (see Figure K). KYNMBOI must be taken whole. Throw away KYNMBOI if it is broken or missing pieces. Use a new KYNMBOI for your dose.</td>
</tr>
</tbody>
</table>

</thead>
</table>
| Place entire KYNMOBI under your tongue. Place KYNMOBI as far back under your tongue as you can (see Figure L). Close your mouth. | Keep KYNMOBI in place until it has completely dissolved (see Figure M).  
- Do not chew or swallow KYNMOBI.  
- Do not swallow your saliva or talk while KYNMOBI is dissolving because this can affect how well the medicine in KYNMOBI is absorbed. | Open your mouth to check if KYNMOBI has completely dissolved.  
It can take about 3 minutes for KYNMOBI to dissolve.  
After the film completely dissolves, you may swallow. |

For assistance with the KYNMOBI child-resistant carton, please ask your care partner for help. You may also contact your doctor or Sunovion Customer Service at 1-888-394-7377 with questions or for support. This Instructions for Use has been approved by the U.S. Food and Drug Administration.
